Course Overview :-

Governments levy taxes on residents to create revenue for projects that would strengthen the country's economy and raise the standard of living for its citizens. In India, the government's right to impose taxes is derived from the Indian Constitution, which divides the power to levy taxes between the Central and State governments. All taxes charged in India must be accompanied by a law issued by either the Parliament or the State Legislature. Taxes are a type of financial levy levied by the government on individuals and businesses in order to pay various government expenditures and programmes. This course covers financial structure, taxation, accounting records, and managing monetary arrangements, with a focus on tax evaluation. Mode of Examination : MCQ

Objective of the Course : Now-a-days, English Language is considered as a mandatory section in the syllabus in almost all the competitive exams at all levels (State/National/International). This compulsion of English Language in competitive exams pushed and motivated us to design a program for the students where they can polish their skills of English Language. Our objective is to train them ready to face any competitive exams of English Language. In competitive exams, the English Language incorporates three important sections: Grammar, Vocabulary, and Comprehension. These three sections enable the exam conducting committees to examine the proficiency of aspirants/applicants in reading, writing, speaking, listening and understanding of English Language. So we have designed the syllabus of our program which incorporates all these three sections and one descriptive section as all these areas of English Language play a fundamental role in qualifying the competitive exam of English Language.

Note: will be given to all the participating students.
